

1. Team name and naming rationale
  - a. Provolone protocol - Because Gael has never had a grilled cheese and it spiralled from there.
2. Team member photo and biography (200 words + pic)
  - o Maddie

Madeline is a driven and detail-oriented Computer Science student at Howard University, expected to graduate in 2027. She has a strong foundation in software engineering and cybersecurity, with experience in Python, Java, and GoLang. As a selected participant in the Google Tech Exchange program, she is advancing her technical skills through courses taught by Google engineers, including Software Engineering with integrated generative AI.

Madeline previously interned at Google as a Software Engineering Intern, where she collaborated on project solutions, navigated large-scale codebases, and optimized existing software. She has a keen interest in cybersecurity, demonstrated through her involvement in Howard University's Cybersecurity Club and her completion of the SANS Cyber Academy Foundation program. She actively participates in capture-the-flag (CTF) competitions and hackathons, refining her skills in ethical hacking, reverse engineering, and network security.

Beyond technical expertise, Madeline has leadership experience in student government, organizing initiatives that bridge administrative goals with student needs. She is passionate about integrating security best practices into software development and is exploring opportunities in both the private and public sectors. With a proactive mindset and a commitment to impactful innovation, she strives to make meaningful contributions in technology and cybersecurity.

Gael -

I am a Computer Science student at the University of Texas at El Paso (UTEP). I chose to study computer science because I had always wanted to work in an engineering field and believed that CS would give me the skills to work in a diverse number of fields. For now, I am trying to get my foot in the door of the software industry and learn from the best the field has to offer.

My professional experience is very small. I have interned with AWS in the summer of 2024 and I am a part of the 2025 cohort of the Google Tech Exchange program. Although these are not exactly where I imagined myself when I was younger, these experiences have been instrumental in my development as a SWE. I am very thankful for having these types of opportunities.

I also believe that my professional experience and college major are the least interesting parts about me. I am a big believer in equity in tech, and have worked with local after school child care programs to introduce robotics and chemistry to under represented groups in El Paso. Lastly, I am a huge basketball fan. I try to play frequently (although that does not mean I am very good at it) and discuss professional games a lot with my friends. It's helped me make a surprising amount of friends with goals similar to mine, so I see myself playing and talking about it a ton in the future.

**Frida Peña**

Frida Peña is a Computer Science student at The University of Texas at El Paso (UTEP), expected to graduate in May 2027. With a passion for technology, problem-solving, and mentorship, Frida actively seeks opportunities that bridge technical skills with real-world applications.

Currently, Frida leads the Computer Science team at the Keck Center for 3D Innovation, where they assist researchers by developing software solutions, improving data management, and optimizing research workflows. They also contribute to the center's web application for monitoring LPBF (Laser Powder Bed Fusion) data, working to enhance its functionality for researchers.

Beyond research, Frida is a Google Tech Exchange student, gaining industry-relevant experience through an intensive academic and professional development program. They are also committed to fostering diversity in tech as a mentor for Girls Who Code, guiding high school students in their exploration of computer science.

Frida's professional experience includes teaching assistance, guest services at Chihuahuas Stadium, and active participation in the SHPE Conference, where they network with industry professionals and explore career opportunities. As a dedicated member of the Coding Interview Club, they refine their algorithmic problem-solving skills through weekly technical challenges.

Driven by a mission to make technology accessible to underrepresented communities, Frida believes in the power of coding to create opportunities for all. They continuously seek new challenges, collaborations, and innovative projects that drive meaningful impact in both research and society.

## Emiliano Garcia

Emiliano Garcia is a Computer Science student at the University of Texas at El Paso (UTEP) who enjoys problem-solving, and learning new technologies. His experience in web development, mentoring, and research has shaped his approach to collaboration and critical thinking. He values teamwork and is always looking for ways to improve both his technical and communication skills.

Before this class, Emiliano worked as a Web Developer at the Mike Loya Center for Innovation and Commerce, where he helped improve digital platforms and learned the importance of creating user-friendly experiences. He also worked as a Computer Science Peer Leader, mentoring students in introductory programming courses. In this role, he developed strong leadership and communication skills by guiding students through fundamental programming concepts, helping them troubleshoot issues, and encouraging problem-solving strategies.

In addition to his hands-on experience, Emiliano had the opportunity to present at SIGCSE 2024, where he shared research on improving CS education. This experience reinforced his ability to communicate technical ideas effectively and gave him a broader perspective on the impact of technology in education.

Outside of academics, Emiliano enjoys playing tennis, doing analog photography, and watching movies. He is excited to contribute to this software project by bringing his technical skills, and enthusiasm for learning.

### 3. Team expectations and agreements

| # | Question                                                | Team Agreement                                                                                 |
|---|---------------------------------------------------------|------------------------------------------------------------------------------------------------|
| 1 | What are our team goals for this project and the class? | To create a productive workflow where we are all able to collaborate and complete tasks to the |

|   |                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|---|---------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|   |                                                                                                   | best of our abilities.                                                                                                                                                                                                                                                                                                                                                                                                            |
| 2 | What are each of our strengths?<br>(note: include any strengths, not just technical CS knowledge) | Maddie: <ul style="list-style-type: none"> <li>- Communication/delegation</li> <li>- Databases</li> </ul> Gael: <ul style="list-style-type: none"> <li>- Project documentation</li> <li>- Cloud services</li> </ul> Frida: <ul style="list-style-type: none"> <li>- Adaptability</li> <li>- Pattern Recognition</li> </ul> Emiliano: <ul style="list-style-type: none"> <li>- UML/System design</li> <li>- Proactivity</li> </ul> |
| 3 | How will we communicate with each other?                                                          | We will use a Discord server for voice and text channels                                                                                                                                                                                                                                                                                                                                                                          |
| 4 | How quickly should we expect to hear back from each other?                                        | Within one business day                                                                                                                                                                                                                                                                                                                                                                                                           |
| 5 | What day/time in the week will we meet every week?                                                | Tuesday 7/5 PM EST/ MST - 8/6 PM EST/MST                                                                                                                                                                                                                                                                                                                                                                                          |
| 6 | What are our rules for our weekly meetings?                                                       | <p>Make sure to attend each meeting. Meetings will continue as normal even if someone does not show up.</p> <p>We will try our best to stick to the meeting start and end time</p>                                                                                                                                                                                                                                                |
| 7 | How will we run the meetings?                                                                     | Begin with a mini stand up where we will share our prep, then a goal oriented work session for the remaining time.                                                                                                                                                                                                                                                                                                                |
| 8 | What should we each prepare before each weekly meeting?                                           | <ul style="list-style-type: none"> <li>- Progress Summary</li> <li>- Blockers</li> <li>- Feedback</li> <li>- Questions</li> </ul>                                                                                                                                                                                                                                                                                                 |
| 9 | When we get a group assignment, how will we divide the work? What if                              | We plan to assign roles once we know the specifications of the project. The workload will                                                                                                                                                                                                                                                                                                                                         |

|    |                                                                                                                                                                         |                                                                                                                                                       |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
|    | there is an unequal load of work in an assignment? How will we rotate roles through the class (eg. <i>team leader, notetaker, who submits the assignment, etc</i> )?    | be distributed as fairly as possible. If at any point one of the members has an excessive workload, we will try to be supportive and help each other. |
| 10 | What will we do if a member cannot work for a specified period of time due to an unforeseen circumstance? How will the team react? How will the team get the work done? | Assess missing work, and whoever's most familiar with the task will pick up the task.                                                                 |
| 11 | How do we collectively decide when to submit group assignments?                                                                                                         | Touchbase day-of to make sure everyone is finishing up.<br>Pick someone at weekly meeting to check with team and submit an hour before                |
| 12 | What are our group's rules about using genAI? <i>Remember that each teammate is responsible for their own work, whether genAI is used or not.</i>                       | -Free use (documented)<br>-Include comments                                                                                                           |
| 13 | What happens if one of us breaks the rules in this agreement?                                                                                                           | We move on, at most a verbal warning                                                                                                                  |
